Electric Roller Blinds

You can enjoy the convenience of effortless operation with an **Barter Electric Roller Blind**.

The powerful motor is concealed within the tube on which the fabric rolls.

Choose from 12 volt motors or 240 volt motors

You can operate with infrared remote control, radio remote control, switch or even connect it to your building management system (eg C-bus) to integrate with timers or master controls within your home theatre.

You can operate up to ten 12 volt motors within the same room individually with the infrared remote control, or, if you want to operate them all together as a group, there is no practical limit to the number of blinds you can operate together. The radio remote control can control up to six 240 volt motors individually from the same remote control or an unlimited number as a group.

Contact us for wiring details before the wall linings are in place to ensure lower costs and a trouble free installation.
